## Overview

VIVOTEK's IE9111-O or "AI-BOX" is an edge computing device that employs the Qualcomm QCS605 chip. It is running on S&ST OS, which is an operating system based on the Android Open Source Project. It can integrate network cameras through the RTSP protocol to obtain images for analysis and calculation for AI-related applications. With AI-BOX, users can upgrade their existing surveillance devices into an AIoT intelligent system.

Since IE9111-O is driven by OSSA device, users can download and install Apps on IE9111-O via the S&ST App Store, and empowers network cameras with various intelligent video content analysis applications such as facial recognition, license plate recognition, and behavior detection. Users can install and operate multiple Apps on IE9111-O at once for more versatile, intelligent, and effective applications.

The IE9111-O is equipped with Octa-Core SoC based on the Qualcomm Vision Intelligence Platform, AI technology, and the neural processing engine of the Adreno 615 GPU, Spectra ISP and Hexagon DSP. It supports hardware acceleration for deep learning, powerful visual computing and edge computing performance that can optimize AI image processing capabilities.
